

## **Turner (Mori Seiki turning machine with milling head with Fanuc)**

### **Your tasks**

- Setting and operating of CNC turning machines
- Determine, measure and equip the tools
- Independent reading and conversion of drawings
- Measure and check the finished components
- Programming on the machine
- Experience in operating lathes with a milling head is helpful, but not a requirement. (The company is willing to train new employees in the handling and operation of turning machines with milling head.)

### **Your profile**

- Several years of professional experience in dealing with CNC turning technology
- Careful, team-oriented and responsible work

### **Company**

- Permanent contract
- Small traditional company near Schwäbisch Hall
- Performance-based pay
